## CHANGE IN WATER TARIFF

The Emaar team is continuously striving to operate our facilities at the highest level of efficiency.

With the rapid growth of Marassi's community, and in turn its water consumption, our Facility Management team has been able to expand the capacity of Marassi's water desalination plants using the latest treatment technologies. The expansion will ensure a stable supply of potable water, while lowering the total cost per cubic meter produced.

**This means that, as a Marassi resident, you will be able to enjoy quality potable water at a lower price. The price, as of January 1st, 2016, is 9.9LE per cubic meter, down from the 12LE price in the contract.**

As a leader in world-class communities, Emaar does its best to avoid issues of water quality common to developments of the Egyptian North Coast. Marassi's state-of-the-art desalination plants undergo frequent tests by World Health Organization-certified labs to ensure that its production meets global standards.

N.B. To ensure the continuation of your services, please make sure to sign your utilities contracts and pay all your dues at an Emaar Misr branch.
